Important Notice for Voters: Re Root Cause of All Resource Conflict:

Earth is not flat. Resources are finite. When voters vote for politicians – left or right, white or black, man or woman, religious or secular, oligarch or comedienne, freedom fighter or terrorist, etc – who legislate laws allowing for breeding and/or consumption above ecological carrying capacity limits, it results in resource depletion, ecological overshoot and racial, religious, class and gender resource conflict. All local, national and international military, political, and economic racial, religious, class and gender resource conflict are symptoms of clauses of international law enabling procreation and consumption above ecological carrying capacity limits.
